

DRIVE A TURBINE

Welcome to The National Museum of Transportation's first ONLINE AUCTION!

Bidding starts at noon on MAY 8th and runs through noon on MAY 15th.

The Chrysler Turbine car was produced in the early 1960's by an Italian design studio, and assembly was completed in Detroit. There were only 55 produced, and ours is the only operational turbine car on public display. The turbine car is notable because it has, you guessed it, a turbine engine. There are reports of the car running on everything from tequila and perfume, to peanut and soybean oils.

This unique opportunity comes with a private meet and greet with a Turbine expert, 30 minutes of drive time at the National Museum of Transportation property, and a photo shoot!

This car lover's dream will not come around again!

Bidding ends at noon CST on May 15th.

A private meet and greet with a Turbine expert, 30 minutes of drive time at the National Museum of Transportation property, and a photo shoot!
